

Embracing diversity in healthcare

Princess Alexandra Hospital Online Health Symposium

24–27 August 2021

This year the symposium is a fully online, virtual experience on **zoom**

Radiology spreading across the divide

WEDNESDAY 25 AUGUST | 7.15AM–8.15AM | VIA ZOOM VIDEO WEBINAR

Radiology has long gone beyond bones and barium. The reliance on radiology for colorectal carcinoma patients optimises appropriate initial treatment options. The importance of accurate staging determines appropriate treatment options to maximise outcomes and minimise futile regimes for best patient care. This will cover CT, MR and PET. The second part will be the role of radiology in complex surgical planning. This will outline the niche role of radiology in innovative solutions using modern technology including 3D printing to enable functionality in patients with previously deemed unsalvageable disease.

Dr Sonja Gustafson

Princess Alexandra Hospital, Royal Brisbane and Women's Hospital and Breastsreen Queensland

Role of magnetic resonance in rectal staging determining treatment option

Adj Prof Thomas Lloyd
